Fallback MUFG

Cologne, 14.09.2019

Fallback – Access description

In the event that the dedicated interface does not perform in compliance with Art. 32 PSD2 RTS on SCA, that there is unplanned unavailability of the interface or that there is a system breakdown, we provide a secondary access option to our systems. For this purpose, we ensure that the third-party providers (TPPs) are identified and provide the authentication procedures given to the payment service user.
The so called fallback can be used by TPPs in compliance with Art. 33 (1)(4)(5) of the PSD2 RTS on SCA and can be accessed with a valid eIDAS certificate under the following URL:

https://psd2.bvxs2a.de/webcms
