

XS2A Performance & Availability Report 2020

XS2A Performance & Availability Report 2020

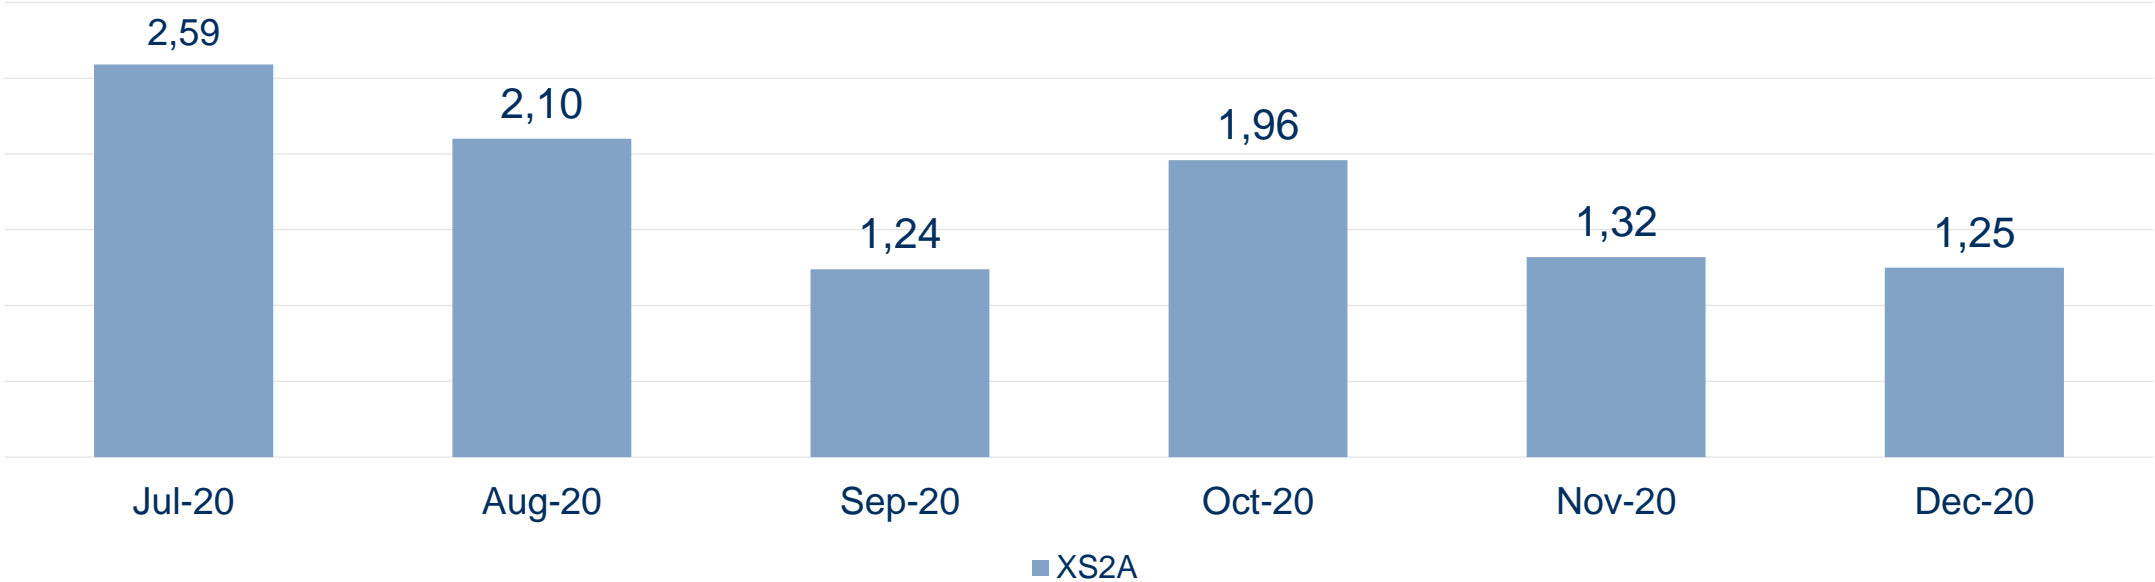

AVAILABILITY (%)

Note: The XS2A availability is measured externally and it is thus impacted by the network stability. Since Nov-20 not only the XS2A interface availability but also the backend availability is traced.

XS2A Performance & Availability Report 2020

PERFORMANCE AISP (sec.)

Note: All the necessary steps to get an AIS response are summed up (incl. the consent setup with a SCA every 90 days).

XS2A Performance & Availability Report 2020

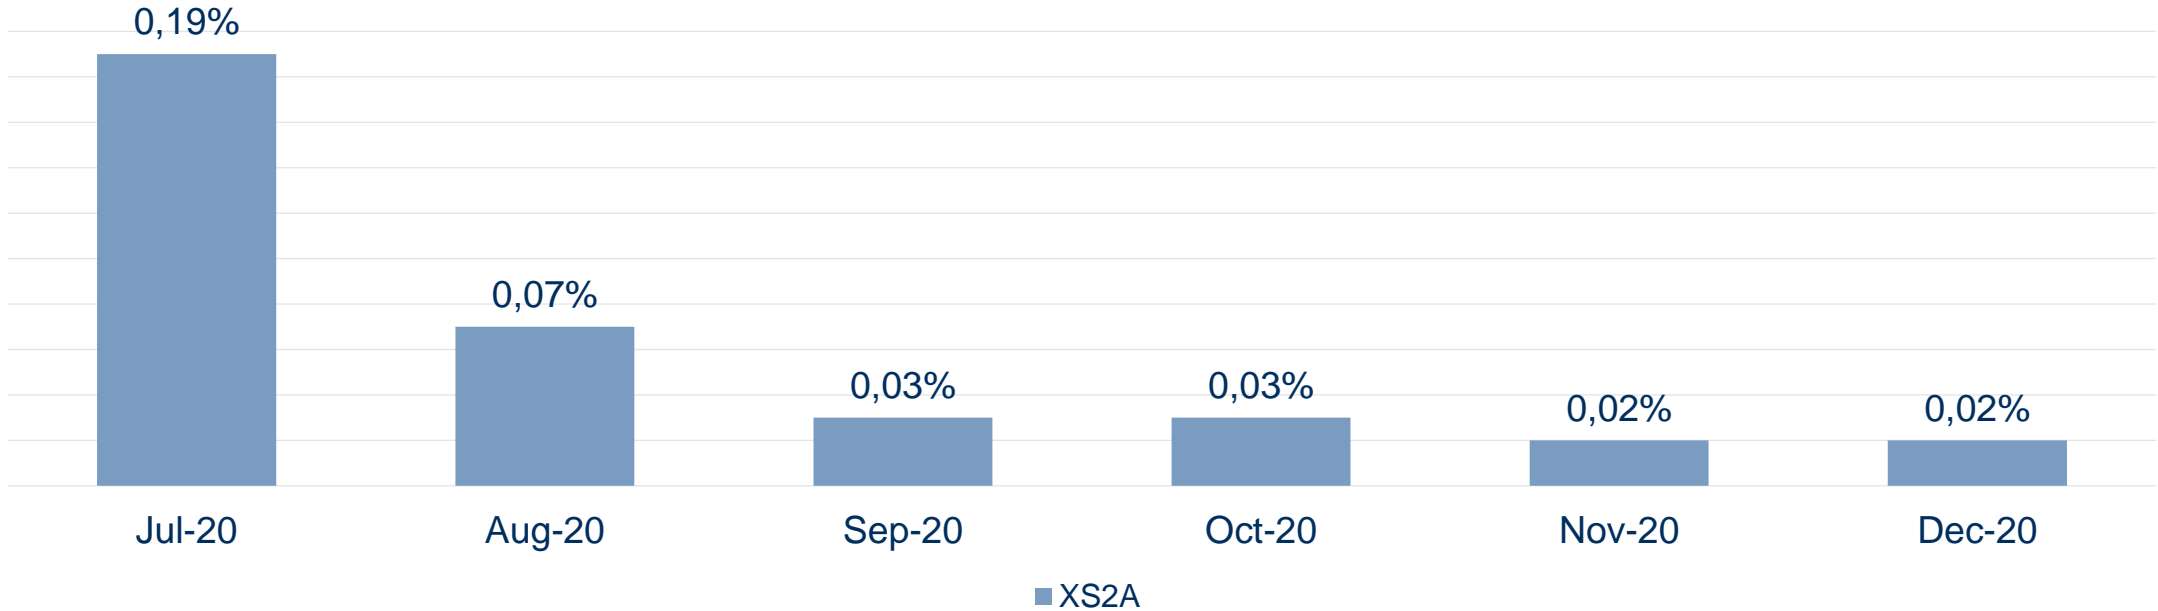

PERFORMANCE PISP (sec.)

Note: All the necessary steps to initiate or delete a PIS transaction are summed up (incl. a SCA).

XS2A Performance & Availability Report 2020

ERROR RATE (%)

Note: The error rate includes server errors that occurred during planned downtimes.
